Custom sizes and materials available

This cabinet from the Ramka-series offers modular, personalizable shelving. It beautifully combines open selves and storage space hidden behind doors.

The frame gives the cabinet an interesting, airy look and offers possibilities to personalize the cabinet: you can showcase important items inside the frame or insert storage cubes that can be used for exaple for folders or plants.

All sides of the cabinet are finished so it can be placed in the middle of a room. It can used as a divider in offices and restaurants. The design ensures that even with a good amount of storage space the look is still fresh and light.

The cabinet and the doors are painted MDF. The doors are equipped with a finger groove for ease of access, so no handles are required.

MATERIALS

Painted MDF, veneer, melamine, powder coated metal.

Standard materials come in three price groups: Ecoline, Colorline and Designline

CUSTOMIZATION

Ramka cabinets come in two standard sizes. Measuremets are adjustable according to project. Also materials, veneers and colors can be altered to best suit each project.

Ramka-series is designed by interior architect Sabina Dontcheff.
