W 1800

D 800

H 620-1260

Custom sizes and materials available

Verso is a beautiful and modern electric desk that offers plenty of storage space. The idea behind the desk was to design an electric height adjustable table that fits in flexible open office spaces.

Ample space to store everyday items was an important detail to include in the design. The desk features a drawer for smaller things on the side of the table and a storage compartment that opens from the top.

All the materials of the desk were carefully chosen. In addition to beautiful veneer details the desk has a pleasant nanolaminate surface that is durable and easy to clean.

The height is adjusted with a digital screen that can hold up to three different presets.

## MATERIALS

Top, front and sides (default materials): Nanolaminate, black or white

Height control: DPT, 3 presets.

Base: Black or white electrically adjustable T-base.

Drawer and storage compartment: Veneer.

## CUSTOMIZATION

Verso is manufactured in Adi's own factory and this gives broad possibilities for customizing the desk.

Colors, measurements, materials and accessories can all be customized.
